

NT Climate Justice Workshop Series

CLIMATE SOLUTIONS FOR TERRITORY COMMUNITIES

Alice Springs | 5 and 6 March 2020

Following on from the inaugural NT Climate Justice Workshop in September 2019, join us to build connections, share knowledge, skills and stories, and generate just solutions to the climate challenges facing Northern Territory communities.

We acknowledge that this event will be taking place on the land of the Arrrente people and pay our respects to their Elders past, present and emerging. We extend our respect to First Nations people across the country who continue to care for country and lead the fight for climate justice for their communities.

Communities across the Territory are feeling the impacts of climate change: extreme heat, water scarcity, energy poverty, inappropriate housing, food insecurity, health impacts, service disruptions, species loss and ecosystem damage are not distant threats, but real and present challenges demanding an urgent response.

Solving these problems requires new partnerships and sharing of expertise across sectors and between communities.

At the same time, the transition to a zero-emissions economy is opening up new opportunities for communities to participate in and benefit from a shift to clean, affordable energy and sustainable, regenerative futures.

How do we lead this transition together to create more just and sustainable futures for our communities, country and climate?
